OUTRUN THE SUN: THE HARSH PLANET OF CANTICLE

Canticle is a small planet within the Cosmere with a burning hot sun that blights the surface with deadly radiation and extreme temperatures. In addition, The Maelstrom, a colossal firestorm, is always raging. Only the hardest of life can cling to existence in this harsh and unforgiving environment, making Canticle a true testament to the tenacity of life in the face of adversity.

SUPPLIES:

- Printed pages 1 and 2 of this activity
- Scissors
- Metal brad fastener

INSTRUCTIONS:

Cut out the model of the planet below. Cut out the triangular window. Attach the planet model to the first page with a metal brad fastener using the cross in the middle of both circles as a guide. Use this model to educate and warn any curious worldhoppers from wandering to this unforgiving planet.
